***Response to Amendment***

The following is in response to the amendment filed on October 21, 2004.

***Allowable Subject Matter***

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a method of tail threading a web in a dryer section of a paper machine including the conventional steps of cutting the web to form a broke portion and a tail portion and then subsequently guiding and widening the tail portion, the method further comprising turning away the edge of the broke portion along the side of the cut (between the broke and the tail) to form an open draw between the broke and the tail. The prior art also does not disclose or suggest a device for tail threading a web comprising a cutter device and blow equipment located after the cutter that turns away the edge of a broke web and forms an open draw between the broke and the tail.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed October 21, 2004 have been fully considered.

The amendments to the claims have overcome the rejections under 35 U.S.C. 112, second paragraph, set forth previously.

The arguments and amendments to the claims have overcome the rejections under 35 U.S.C. 102(b) and 103(a) based on Sollinger (US 5,600,897). The applied prior art teaches methods and devices for guiding a tail portion of a web, but does not teach or suggest a method or device for turning away a broke portion alongside the cut.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kahl et al (US 6,668,469) discloses a separating device for removing a web from a drying wire towards a catch device.

Goebel (US 6,145,217) discloses a device for cutting and guiding a threading strip in the dryer section.

Fissmann et al (US 5,248,390) discloses a cutting arrangement for cutting a tail in a drying section.

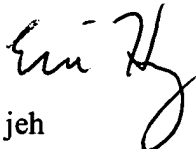

Wanke et al (US 4,648,942) discloses means for cutting and guiding a marginal strip in a drying section.
